

### REMARKS

Applicants appreciate the continued thorough examination of the present application that is reflected in the Official Action of May 17, 2007. Applicants also appreciate the Examiner's indication, in connection with the election of species requirement for Species A, B and C, that:

The species are independent or distinct because they constitute different embodiments of the instant invention which do not necessarily have to be employed together and in fact would be considered to constitute separate inventions if they were to be set forth as independent claims.

In order to advance the present application to allowance, Applicants hereby elect Species C that is directed to photopolymerization, and agree with the Examiner that Claims 14, 15, 17 and 18 are readable thereon. Applicants also agree with the Examiner that Claims 1-6, 10, 11, 13 and 16 are generic.

Accordingly, Applicants hereby elect Species C, corresponding to Claims 14, 15, 17 and 18. This election is being made without traverse, because Applicants agree with the Examiner that patentably distinct species are presented. Moreover, upon allowance of a generic claim, Applicants respectfully request rejoinder of non-elected Claims 7 and 8, and allowance of all of the pending claims.

Respectfully submitted,

Mitchell S. Bigel
